

In respect to the rejected claims, applicant has: a) amended the independent claims 1, 6, 10, 25, 28, 33, 37, 39, 40, 45, 48, 56, 67, 72, 76, 80, 81, 84, 89, 96, 100, 102, 103, and 111 to recite the presence of frequency related information together with the alteration or modification thereof in order to allow the display or presentation of the programs in a differing length, speed, or period of time; while also, b) amending claims 14, 19, 84, 92, 106 and 117 to recite the bypass of an artifact modifying circuit. These recitations track the teachings of the specification and the claims previously allowed in this present application. This action is believed to place these substantively rejected claims into condition for allowance as well.

In that this action is believed to place the application into condition for allowance containing all claims, favorable action is solicited.

Favorable action is solicited.

Respectfully submitted,

William Lightbody
